### Professional Experience

- **Working as Senior Software Engineer at uExcelerate (Hyderabad).**  
(Oct-2020 – Till Date)

### Project Experience:

#### Project #1:

**Project Title:** uExcelerate

**Functional Domain:** AI Enabled Executive Coaching & Leadership Development Platform.

**Client:** Individual Professional/executive, Organizations.

**Team Size:** 3(Full Stack)

**Environment:** Angular, ng-bootstrap, angular-material, node.js, express.js, PostgreSQL, firebase, AWS

**Duration:** Oct 2020 to Till Date.

**Role:** Full Stack Developer.

## **Description:**

**uExcelerate** is **AI enabled executive coaching platform**. Which is a **SAAS** platform. It is actively used by individual and organization. This platform is used by different industries and professionals. On **uExcelerate** more than 10+ different coaching is going on like (Life coaching, executive coaching, managerial conflict, leadership, entrepreneurship, mentorship, etc...).

on **uExcelerate** platform there are different types of Coach are there, and there is an **AI module** that can help you to find the right fit coach. Here a coach can accept the **session request** by coachee. as per the coach availability coach can schedule/re-schedule the session and then a **virtual meeting** will be created for both to connect virtually and organize the session. Coachee can create an **action** to achieve the **goal**. Coach can see all sorts of **record**, like how many **programs** they are involved, how many **sessions** has been completed, on what date. coach and coachee can **chat** each other in **one-on-one chat or group chat**. Coach can create a **digital tool** and share that tool with a particular coachee. Here **admin** and **manager** can see the **statical report** about coach and coachee **engagements**.

**The main objective of uExcelerate is to level-up your executive within.**
